Walk in

Local Vaccine Centres

## New Covid-19 Dashboard

As a result of recent changes to policy, the number of detected cases alone no longer provides an accurate or consistent indication of the prevalence of Covid-19 in our community.

As a result of this, detailed cases data such as the map and district level figures have been removed from our Dashboard. Cases are still shown on the chart, however, we

have now included additional information (ONS Prevalence\*) that may give a better indication of the actual number of people with COVID. Testing data has also been added to provide further context.

Additionally, the hospital admissions data now includes mechanical ventilation bed patients who are positive as a better indicator of serious illness being treated. The OPEL level on this page provides a snapshot of how the health and care system overall is managing.

The vaccination page now provides more overall strategic vision of how the vaccination programme has been implemented and provides an indication of the effective level of immunity provided to our community by boosters and third doses.

From next week onwards we will publish the dashboard to the website, on the second working day of each week only. The current version of the dashboard can be accessed at any time from this location: <https://www.somerset.gov.uk/covid-19-dashboard/>

*\*ONS Prevalence Survey estimates the proportion of people in Somerset testing positive based on a survey undertaken by the Office for National Statistics (ONS).*

Covid Dashboard

**Complete our short survey to tell us what you think about borrowing a blood pressure monitor from your local library.**

**It only takes 10 minutes!**

SOMERSET CORONAVIRUS SOMERSET County Council

A new consultation is live which will help us inform the roll out of a scheme which gives residents the opportunity to loan a blood pressure monitor from their local library. This

consultation is live until the 31st May and is open to all Somerset residents. [Click here for more information](#) Please share widely with your networks
